MANAGER'S OFFICE

Dear Friend:

Knowing that you are a careful buyer of trees and plants, and quick to see the advantage of direct dealing, I am sending you my new 1927 Big Bargain Catalog.

I am sure that you will find it both pleasant and profitable to study each of the 40 pages. Your money will buy better stock shipped to you direct from my Nurseries at Vicksburg, Kalamazoo County—fresh, State inspected stock—the best that money will buy—at lowest cost. CELERY CITY NURSERIES has been in business for many years, and thousands of satisfied customers throughout the Country know the saving and the satisfaction from ordering from this Company.

You send your order direct to us. It is not sent on to another firm in a distant city to fill, but is handled in our own establishment and you get direct, fresh shipment. As trees and plants are living things, you will recognize the value of this direct dealing.

No matter if you have already ordered some trees and plants for the coming season's planting, you can, I am sure, find room for a trial order. If you are not one of thousands of planters who know and value our stock, I want you to compare this season's CELERY CITY NURSERIES' goods with the more costly, and be convinced that ever after, your order and your money for nursery stock will be sent to CELERY CITY NURSERIES.

May I also suggest that you order early—January and February for spring delivery; August and September for fall delivery, if possible—but in any event as early as you can.

Yours for better stock at less cost, sent direct to you.

Sincerely yours,

ORLA RICHARDSON, Manager.

Kalamazoo, Mich., 1927.
GIFT PRIZE
With Every Shipment!

We will repeat our offer of last season to send a GIFT PRIZE with every shipment.

We take this way of showing our appreciation of your order for 1927. May we again suggest that we can serve you better if you will order early.

SPECIAL CASH DISCOUNTS

Our Customers save real money by ordering early and getting the cash discounts; discounts which are two or three times what idle money will earn in the bank.

8% If Cash is sent with order during January and February, we will allow you 8% discount from listed prices.

3% Discount on Cash orders received after March 1.

C.O.D. SHIPMENTS. We will ship your order C. O. D. if desired, when one-fourth Cash is sent with order. You can order at catalog prices and make payment for the goods to the Mailman, Express Agent, or Freight Agent. Of course no discount is allowed on C. O. D. orders. By all means take advantage of these cash discounts, the savings are worth while.

Terms and Conditions of Sale

Make sure of getting what you want by ordering early. Thousands of customers have profited by this suggestion. If it is not convenient to send remittance with order, send order anyway, and pay later. See GIFT PRIZE, SPECIAL DISCOUNTS and C. O. D. PLAN on preceding page. We will reserve the stock and balance may be paid later. The important thing is to order now.

**RATES.** Less than ten trees or plants of a kind at each rates; ten to fifty at ten rates; fifty or more at hundred rates. Purchasers of large lots of fruit trees, etc., should submit list of varieties and sizes as frequently we are able to make even larger discounts on stock in large amounts.

**HOW TO REMIT.** If you take advantage of our special cash discounts of 8% or less, and send cash with order, remittance should be made by check, bank draft, Post Office money order or Express money order.

**GUARANTEE.** Packing is carefully done, the stock being boxed or baled according to the size of order and delivered in good condition to the railroad station, Express Office or Post Office at Vicksburg, Kalamazoo County, Michigan, and we guarantee delivery in good condition. If not in first class condition upon arrival, notify us within five days after receipt of same and we will immediately forward new stock to replace. Our customers tell us that both our grading and packing are superior to that usually seen.

**TRUE TO NAME.** We double check all orders before they are shipped, and everything humanly possible is done to prevent errors. If any of Celery City Nurseries' trees prove untrue to name, we will gladly replace the items or refund the purchase price. Obviously, we cannot assume further responsibility.

**INSPECTION.** The Certificate of Nursery Inspection, issued by the Michigan State Department of Agriculture, is attached to all shipments. When you buy Celery City Nurseries trees and plants you are sure of getting Clean Healthy Stock.

**OUR REFERENCES.** Our customers know us. To those unacquainted, we refer to Kalamazoo National Bank, Kalamazoo, and Farmers State Bank, Vicksburg. We transact business at both Banks.
APPLES
KING OF FRUITS

Apples are money-makers. The return from them is steady and sure. Year after year you can reap royal profits from a good apple orchard and the trees will produce for more than a generation.

Get started at once with our up-land grown trees. They are hardy, fast producers and, when you work along proper lines, will pay you handsome rewards.

NOTICE—Varieties set in large type are especially recommended for Commercial Orchard planting.

Winter Apples

BALDWIN. One of the best and most popular winter apples. Tree vigorous and very productive. Fruit large, round; skin deep red; flesh white, of rich, juicy, sub-acid flavor. Highly valued on account of its handsome fruit and excellent shipping qualities. October to February.

Ben Davis. Late; fruit round, medium to large; skin yellow, with red stripes; flesh white, tender, juicy, sub-acid.

Bellflower, Yellow. Large, yellow; with blush Cheek; very tender, juicy, sub-acid. In use all winter. Very valuable. A moderate grower and good bearer. 10c extra.

DELICIOUS. A National Dessert Apple. Successful wherever apples are grown. Large, conical shaped, beautifully colored, striped red over yellow. Flesh tender, with rich, distinctive flavor, very aromatic and pleasant to the taste. Truly Delicious. Hardy, bears young and abundantly. Brings more money per box than other varieties bring per barrel.

FAMEUSE (Snow Apple). One of our finest dessert fruits. Of medium size, smooth, regular, deep crimson; tender, melting, delightful flavor. The tree is vigorous and hardy, succeeds especially well in the North. November to January.

GRIMES' GOLDEN. A medium to large apple of beautiful golden color, and of the very highest quality. Hardy and vigorous. A quality apple in every way. Can be packed
APPLES—Continued

Gano. An improved Ben Davis, adding to the good qualities of that variety a much handsomer fruit of deep, dark red, that brings a ready sale in market. December to March.

Golden Russet. Of medium size, round-ovate; clear golden russet, with slight blush; tender, crisp, juicy and high flavored. Tree robust and hardy, bearing large crops. November to April.

Hubbardston Nonesuch. Large, handsome yellow, overlaid with red; tender fleshed, with distinct flavor. Strong grower and heavy bearer. November to January.

JONATHAN. A beautiful red apple, highly flavored and of excellent quality. It is tender, juicy, spicy, and rich—a splendid family sort and highly profitable for market. Bears when young and is very productive.

King. Very large, fairly hardy, round, obtlate, yellow striped and clouded; an abundant annual bearer. December to April.

McINTOSH RED. A fragrant, bright red apple with tender white flesh of snow-apple flavor and highest quality. Tree most hardy and vigorous and bears heavy crops while young. One of the best apples for northern U. S. and Canada.

NORTHERN SPY. Crisp, tender, high quality; fine shaped, beautiful coloring; red, usually striped; sub-acid; very productive. November to March.

NORTHEASTERN GREENING. The best of the Greenings. Tree a splendid, vigorous grower, hardy; fruit large, green, becoming yellowish green when ripe; flesh yellow, fine grained and firm; flavor a good sub-acid. Very smooth and attractive; second only to the Wealthy as an all-round late market apple. December to April.

Rambo. Greenish yellow, mottled and striped red. An old well-known sort of good quality. A favorite in many localities. Rambo has served long and faithfully as many people's ideal of what a delicious apple should be. October to January.

Rome Beauty. Uniformly large; smooth shaded and striped with bright red. Bears each year and is a splendid commercial variety as well as for home use. Flesh tender, keen. Should be planted commercially. December to March.

RHODE ISLAND GREENING. Large; green turning yellow, becoming dull blush when ripe; flesh yellow, fine grained, tender, with rich, rather acid flavor. Tree vigorous, spreading and productive. November to March.

STAYMAN'S WINESAP. A favorite for all purposes. Medium size, conical; red on yellow; flesh fine, crisp, high flavored. November to April.

TALMAN SWEET. Medium size, pale yellow, tinged with red; firm, rich sweet. November to April.

WEALTHY. Hardy, thrifty and good bearer. Fruit medium, roundish, smooth, mostly covered with dark red; flesh white, fine grained, juicy; sub-acid; good quality. January. For market, dessert and cooking.

WAGENER. Deep red; medium to large; flesh firm; sub-acid, well flavored. Bears young and yields good annual crops. December to March. More suitable for southern than northern Michigan.

WINTER BANANA. Large, very showy, roundish; deep yellow with red cheek. November till spring. Has a banana perfume; tender and delicious.

Wolf River. Very large; red on yellow; strong grower, good bearer. October to January.

Fall Apples

Chenango Strawberry. (Sherwood's Favorite.) Large, roundish, bright red and yellow; very beautiful and a pleasant apple. A good and early bearer. September and October.

Duchess of Oldenburg. The best known of the Russian apples. Succeeds everywhere, even in the Northwest where most varieties fail and yields well in all sections. Fruit large, rounded, striped with red and yellow; tender, juicy, of the best quality for cooking and esteemed for dessert. Trees bear young, abundantly, very hardy. August and September.

Fall Pippin. Large, and when fully ripe, a beautiful yellow. Flesh is tender, rich and of good quality; especially good for culinary purposes. Tree is hardy and long-lived, growing to great size. September to December.

Maiden's Blush. Of uniformly large size, round beautifully flushed with red on creamy yellow ground; flesh tender, of pleasant, but not high flavor. A good market sort because of its attractiveness and the tree's heavy crops. September and October.

Summer Apples

Early Harvest. Medium; pale yellow; fine flavor; sub-acid; very productive; good either for fresh fruit or for cooking. July and August.

Golden Sweet. Large; fine yellow; very sweet. Tree strong and quick grower, spreading and irregular, also highly productive. August and September.

Liveland. Color orange-yellow, striped, splashed and shaded with red, showing gray dots through the color; flesh light yellow, often stained with red, fine, tender, juicy; medium open; flavor sub-acid, good; season August. There is no apple East or West of better quality than Liveland.

Red Astrachan. Large; crimson; showy, juicy, with rich sub-acid flavor; bears early; hardy. July.

Sweet Bough. The old reliable sweet apple. Large; pale green, with good flavor. July to August.

Yellow Transparent. A Russian apple of splendid quality. The hardiest and finest early apple grown. Ten days earlier than Early Harvest. Fruit large; pale yellow, sub-acid. A very young bearer and entirely hardy. One of the best market sorts.

Crab Apples

Prices of all varieties same as standard apples. For preserves, jelly, flavoring, canning, Crab Apples are very good. Also their tartness is agreeable once in a while when they are eaten fresh. The trees themselves are beautiful, and when loaded with the bright colored fruit, are striking. They are an ornament to any grounds and look well beside the finest ornamentals.

Hyslop. Large; dark crimson, with bloom; very showy. Tree very hardy; late.

Transcendent. The largest Crab apple. Red; showy; excellent. September to October.

Whitney. Large, greenish striped with carmine; flesh firm, juicy and rich. Season last of August.

McIntosh. This is an improved Snow Apple and a leading market variety.
They live a generation. Pears are a standard fruit and will prove a very profitable investment.

Celery City pears are noted for their size and luscious flavor. They are a good standard fruit and always prove an exceptionally profitable investment.

NOTICE—Varieties set in large type are especially recommended for Commercial Orchard planting.

Summer Pears

BARTLETT. Large size, with beautiful blush next the sun; buttery, very juicy and high flavored; bears early and abundantly. August and September.

Clapp's Favorite. Large; pale lemon-yellow; flesh fine grained, juicy, melting, rich and buttery. A cross between Bartlett and Flemish Beauty; earlier than Bartlett and resembling the Flemish in growth. Pick the fruit at least ten days before it ripens upon the tree. August and September.

Fall Pears

Buerre d'Anjou. Large greenish, shaded with russet-crimson; the flesh is highly flavored, rich and vinous; very productive, either as dwarf or standard. For late fall and very early winter use, we have no better variety. Anjou is one of the best commercial sorts, ranking with Kieffer and Bartlett as money makers. October to January.

Duchesse d'Angouleme. Very large, with rough and uneven surfaces of a greenish yellow, with patches of yellow and dull red cheek; a vigorous and strong grower and a good bearer when quite young. It attains its greatest perfection on the quince root, on which all of our trees are budded. In season during October and November.

Flemish Beauty. Produces good crops annually of large, handsome fruit that is exceptionally good in quality, every year. September and October.

Kieffer. Profitable market variety on account of its shipping and keeping qualities; of extraordinary size and beauty. While not of the best quality, it is one of the favorite sorts for canning or preserving, and the early-bearing heavy-cropping trees render it desirable for quantity. October and November.

Sheldon. A large, round, russet and red pear, of the very finest quality. Hardy, free-growing, fruitful. October.

Winter Pears

Seckel. One of the richest and highest flavored pears known; always in demand for desserts and luncheons and better known than any pear of its class. The tree makes a somewhat slow but stout and erect growth. September and October.

Lawrence. Medium size; fine golden yellow; melting, sugary and aromatic. An American pear of great excellence. Tree a moderate grower, handsome, hardy and good bearer. The most valuable of the early winter pears. Fine looking on market. December.

Cherry growing is not difficult. Cherry trees are hardy, will grow in almost any but wet soil, and require very little attention. In fact, of all fruits, cherries will stand neglect with the least harm and will often endure it for years at a time with apparently little falling off in yield.

It is surprising the number of home owners who have not the time or the facilities for commercial production who have planted a few of our hardy cherry trees and are now enjoying the rich fruit the year round. Cherries are the first tree fruit of the year and always welcome. Celery City brands can be canned with practically no loss in their delicious qualities.

Sour Cherries

EARLY RICHMOND. (English Pie Cherry). An exceedingly productive and reliable old variety, with dark red fruits of medium size and sprightly acid flavor. Unsurpassed for cooking. June.

English Morello. Large; dark red, nearly black; tender, juicy, acid, rich. Tree dwarf and slender. Valuable sort for near-by market. July.

MONTMORENCY. Probably the best hardy cherry for home and market use. It is of large size, light red in color, stem rather short. The tree is very vigorous and hardy and bears soon after planting. The fruit is in great demand by canning factories and others, and sells at fancy prices.

SWEET CHERRIES

Black Tartarian. This fine old variety produces immense crops of very large purplish black fruits of mild, sweet, jelly-like consistency, fine flesh. The tree makes a beautiful, erect growth. Late June and early July.

Bing. Tree hardy and a strong grower, especially adapted to the East, though it came from Oregon. The fruit is extra large, black, very fine and excellent for commercial purposes.

Governor Wood. A rich and delicious large, light red cherry that hangs well on the tree. A very popular sweet variety. June.

LAMBERT. One of the largest of all cherries. It is purple-red; firm and rich. Every year sees an enormous crop, and the tree not only grows well, but is proof against insects and fungus attacks.

NAPOLEON. Of fine appearance and the very largest size; yellow and amber, with bright red blush; flesh firm, juicy, delicious. Profitable for a market variety; finds a ready sale both for canning and dessert. Forms a grand tree that ripens its heavy crops in July.

Windsor. Trees hardy and prolific. Fruit large, liver-colored, firm and of fine quality. Hangs well on the tree and is not subject to rot. Valuable for late market or home use. July.

What's a Cheap Tree?

The BEST Tree that money can buy is the only "CHEAP" Tree

—and that kind of tree can always be had of the Celery City Nurseries at a fair and proper price.

We've grown, sold and delivered trees from Kalamazoo for twenty years. We are nurserymen exclusively—it's not a side line with us.

Everything in standard fruit trees, shade trees, berries, shrubs, vines and roses.

Celery City Nurseries
KALAMAZOO, MICHIGAN
A READY MARKET FOR HIGH GRADE PLUMS

No orchard or home is complete without this fresh, luscious fruit to eat out of hand. Some varieties are such fast growers that they also serve as ornamental trees while slower growers are developing.

Nearly everyone likes plums with their meaty sweet taste and they are so easily raised that every man with a little ground should have two or more trees.

Hybrid Plums

HYBRID PLUMS we cannot say enough for. Very hardy for cold climates, they bear large crops, mostly small and medium-sized, highly colored fruit. They bear when only one and two years old in the nursery. They seem to thrive in the most unfavorable soils and climates. When planting this type, several varieties should be in the same orchard so that the blossoms will fertilize properly.

Opata. Cross between Sand Cherry and Gold Plum. Tree vigorous, fruit dark purplish red, flesh green, quality delicious, pit small, season early, fruits second year after transplanting.

COMPASS. This tree produces the first year after planting. It bears invariably at two years old large quantities of most excellent fruit. In size it is larger than the Early Richmond Cherry. The quality is between the cherry and the plum. This perfectly hardy fruit was originated at Springfield, Minn., and is a cross between the native Sand Cherry and the American Plum. The fruit brings the best prices of any on the market, and the demand has never been supplied.

Sapa. Cross between Sand Cherry and the Sultan Plum. Fruit is a dark blue, glossy skin, deep wine-red flesh of the Japanese type. Trees frequently fruit when only one

PLUMS—Continued

HYBRID PLUMS—Continued

year old. This variety took first prize as Seeding Plum at the Minnesota State Fair, 1909. A high compliment to this variety. Splendid for eating out of hand or canning. Tree very hardy. Pit small. Fruits early in the season.

Toka. One of Prof. Hansen’s New Fruits. Originated at South Dakota Experiment Station. Bears annually even when other varieties fail. Tree strong and vigorous grower; early and heavy bearer of handsome fruit; color red; flesh firm; splendid cooker. A valuable acquisition to the plum family.

UNDERWOOD. Tree extremely vigorous, large size, of spreading growth forming a round head. Very hardy and very productive. Fruit is large, roundish-oval, attractive red in color. Flesh is juicy, fairly firm; hangs well to tree. Ripes very early and continues over a long season. Stone is small, cling. Quality excellent. Many growers consider Underwood as combining most of the good points required for a hardy plum of large size, excellent quality and market value.

WANETA. This variety was introduced about the same time as Kahinta, and as noted above is of same parentage. The tree is more spreading than the former. It is a heavy annual bearer, dark red in color. Thin skinned; flesh firm in texture, yellow in color and very sweet to the taste. Though the fruit averages a trifle smaller than Kahinta, it is regarded by many as an equally valuable variety, and preferred by some.

Japanese Plums

JAPAN PLUMS are attracting the attention of growers because of their showy appearance, their fungus-resisting foliage, and their adaptability to almost any soil and climate.

Abundance. Lemon-yellow ground, nearly overspread with bright cherry and with a heavy bloom; large to very large, oblong, tapering to the point. Flesh orange-yellow, melting, rich and highly perfumed; abundant and annual bearer; vigorous, upright grower. August.

BURBANK. Large, nearly round and bright cherry-red; flesh deep yellow, sweet, meaty and quite firm; keeps and ships finely. Tree vigorous and spreading; needs close pruning. Late August.

European Plums

EUROPEAN PLUMS are distinguished for their high quality. They require good cultivation and frequent care but will pay you well for the time spent.

BRADSHAW. Very large; dark violet-red; flesh yellow, juicy, good. A productive, valuable market sort. August 15.

Gueii (Blue Magnum Bonum). Large; deep bluish-purple, with thick bloom; flesh yellow, coarse, but sweet and good. While still young the trees are loaded with enormous crops, most of which they carry to maturity; vigorous and hardy, growing fast. Profitable for market. Early September.

GRAND DUKE. Large dark red, of fine quality. Free from rot; very productive. Last of September.

GERMAN PRUNE. A valuable plum of fair quality for dessert, but most esteemed for drying and preserving. Large, long-oval, purple with a thick bloom; flesh firm, sweet and pleasant, separating from the stone. Moderate grower. September.

LOMBARD. Medium to large; dark red; flesh yellow, of pleasant flavor. The tree is unusually vigorous, succeeding well even on light soils, and produces heavy annual crops. Late August.

MONARCH. Large, nearly spherical; deep purple-blue, with thin bloom; flesh pale golden green, juicy, pleasant, free from stone when ripe. Trees bear young. October, after Grand Duke.

REINE CLAUDE. (Bavay’s Green Gage), Round, greenish yellow, juicy, melting, sugary, rich and excellent; separates from the stone. Tree vigorous and productive. Last of September.

Shipper’s Pride. Large, oval, dark purple, of Damson type. Flesh sweet and firm, keeping and shipping long distances well. September.

SHROPSHIRE DAMSON. Tree vigorous and enormously productive. One of the old favorites. October.

Yellow Egg. Large, egg-shaped yellow plum. A little coarse, but excellent for cooking. Free grower and productive. End of August.
PEACHES

Easy to grow, quick to bear, profitable to market, and delicious to eat.

Peach trees grown in immense quantities on the edge of Sunset Lake near Vicksburg, Kalamazoo County, have long been one of our leading specialties. Many of the leading peach growers of our state have contributed buds from bearing trees to insure true to name stock. Every year we get letters from people, who have taken our word for this, telling of their remarkable success and the superior quality of their fruit.

NOTICE—Varieties set in large type are especially recommended for Commercial Orchard planting.

Admiral Dewey. A perfect freestone, of fine size, form and color, with delicious yellow flesh that is yet firm enough to ship well. The tree is a strong, hardy symmetrical grower and produces well. July.

BANNER. Large, yellow with crimson cheek. Flesh yellow, firm, rich, excellent. Good shipper.

Beer's Smock. A large, yellow-fleshed peach, similar to Smock Free, but superior to it. Ripens a few days later and is better annual bearer. Late September and October.

Carman. White; free; early. Large, resembles Elberta in shape; color creamy white, with deep blush; skin very tough; flesh tender, fine flavor and quite juicy. One of the hardiest in bud. In shipping qualities and freedom from rot is unsurpassed. Profitable market variety.

CHAMPION. Unusually large. A sweet, rich, juicy, freestone, beautifully colored with creamy white and crimson; a good shipper. Hardy, productive, profitable. August.

Crawford’s Early. A magnificent large yellow peach, noted for size, good quality and wonderful productiveness. Late August.

Crawford’s Late. Similar to Crawford’s Early, but about a month later in ripening. The fruit is of the largest size. Late September.

Crosby. Of medium size and peculiar roundish, flattened shape; bright yellow, splashed with carmine; flesh yellow, of good flavor. Tree hardy and immensely productive. September.

ELBERTA. An ideal market peach, and a royal fruit, from its yellow and red skin to its stone. The size is enormous, the quality excellent, the tree vigorous and productive. Better still, the market has never yet had enough of this sort.

EARLY ELBERTA. Ripens about a week earlier than Elberta; otherwise the same, or a trifle better quality. Price 10c extra in all sizes.

ENGEL’S MAMMOTH. A very fine, large market sort, resembling Late Crawford, but more productive. Very profitable wherever grown. September.

Fitzgerald. Of Canadian origin. Of very large size, magnificent quality and a perfect freestone. Stone very small; flesh yellow, very firm; rich and juicy. A splendid shipper and makes a beautiful appearance in market. Four of these peaches weighed, upon a test, fully two pounds. It is very early in Canada.

GOLD DROP. The almost translucent golden colored flesh of this peach renders it exceedingly attractive in market. The tree is hardy, bears early and profitably. Late September.

J. H. HALE. Combines all qualities most desired, either for home or market. Brilliantly colored, deep golden yellow with carmine blush. Skin thick, without fuzz, smooth as an Apricot. Flesh deep yellow, firm, fine grained, tender, melting, luscious flavor. Very solid and heavy peach of immense size, fully one-half larger and harder than El-

ELBERTA, One-Third Size
PEACHES—Continued

Hill's Chili. Of New York origin. Hardy, vigorous and productive; of a medium size oval, with a slight suture; deep yellow, shaded with dark red; flesh deep, yellow, red at the stone; free-stone. Last of September.

Heath Cling. One of the finest canning peaches; good size; lemon shape; tree a good grower and an excellent bearer.

IREY. Originated near South Haven, Michigan, and being grown and sold by nurserymen under several names. Said to be a good early yellow free-stone, resembling Rochester. Price 10c extra in all sizes.

KALAMAZOO. One of the leading Michigan varieties, originated in the city whose name it bears. Large; golden yellow with crimson cheek. The thick yellow flesh is of a delightful flavor, and the pit small. The tree is strong growing, hardy and productive. Ripens between Early and Late Crawford.

NEW PROLIFIC. As its name indicates, a very prolific variety of excellent quality fruit, golden yellow, with red cheek large and handsome. Middle of September.

SALBERTA. A highly successful cross between Salway and Elberta, conserving the size, quality and productiveness of Elberta for the more profitable later picking due to Salway's influence. Two to three weeks later than Elberta, richly yellow and succulent, it is bound to briskly rival the Smock for market supremacy during the latter's well established season. Price 10c extra in all sizes.

STEARNS. A new Michigan peach which originated in South Haven, Michigan, and has been a prolific grower. A perfect free-stone with yellow flesh and brilliant red skin. As a shipper it cannot be surpassed. Tree is a strong, upright grower, extremely hardy and free from disease. Last of September.

Triumph. The earliest yellow-fleshed peach, ripening with Alexander and as good for eating as shipping. The tree blooms late and bears annual, abundant crops. Freestone when fully ripe. August.

WILMA. The fruit is large as Elberta (its parent), not quite so elongated, color very much better, and ripens about ten days later. Its more attractive color outsells Elberta when side by side on the market. Price 10c extra in all sizes.

Yellow St. John. A superfine early yellow freestone, nearly as large as Crawford, as finely colored and of even better flavor. Its round, showy fruits always attract attention and sell well. A fine dessert peach. The tree bears well while still small, and abundantly afterwards. August.

THE ROCHESTER PEACH

The Rochester is a very recent production and market men particularly admire its splendid keeping qualities.

It is a large, yellow-and-red free-stone; flesh yellow, very highly flavored; to eat out of hand or canned it cannot be equaled as a table delicacy. Specimens measure 12 inches around and weigh 12 ounces. Stone very small and will ship as good as Elberta. The peach comes into ripening during mid-August, when there

are on the market no other yellow-and-red freestones of quality, and the Rochester, therefore, commands the very highest prices.

The tree comes into bearing when very young. Is a strong, upright grower, hardy as an oak. Has stood 16 degrees below zero and produced a full crop; while Elberta and Crawford under the same conditions in same orchard produced no blossoms and consequently no fruit. Price 5c extra in all sizes.
PLANT A FEW QUINCES FOR DAINTY FLAVORING

The Quince is a most useful and valuable home fruit much esteemed in cookery. Its flavor is perhaps the most delicate, delicious and individual of anything which grows. Lemon, strawberry, pineapple and cherry all taste rich and good; but quince syrup and quince honey surpass them all. It’s like the aroma of roses and the sweetness of orange blossoms. Nothing can take the place of the quince for preserves, jellies, syrup, fruit flavoring, or, in fact, any dainty dessert. Quinces will grow and yield well almost anywhere. They are hardy and respond wonderfully well to up-to-date methods of cultivation and spraying. It is quite likely that with improved, modern handling, the quince will again come into very general cultivation.

ORANGE. Popular extensively cultivated, reliable and satisfactory. The name was given in attempt to do justice to its most delicious large, fine-grained, fine quality. Best for cooking. Firm, will stand handling and shipping. September. Roundish, bright golden yellow.

APRICOTS

Superb. The best Apricot now offered. Perfectly hardy, has no superior in productiveness. Beautiful yellow with slight blush; flesh firm and solid. One of its many desirable traits is its long season, covering a period of three weeks.

RHUBARB OR PIE PLANT

Myatt’s Linnaeus. It is early, tender, without being in the least tough or stringy, with a mild sub-acid flavor. Early in the spring its distinctly acid flavor is quite acceptable.

Price, 20c each; $1.50 per 10; $2.75 per 25; $16.00 per 100.
Concords, known the country over as the best for Grape Juice, Jelly, and table use.

Large clusters of luscious Concord grapes are always in demand.

Decide now to set aside an acre or more for a vineyard of Concord grapes this year. You will find them a sure crop that will pay big returns. For only $28.00 we will send you 500 (enough for one acre) good Concord grape vines. If you want to take advantage of this big bargain, order at once.
GRAPES—Continued

Grapes are the one fruit that everybody should raise. Apples, peaches, plums, cherries, quinces, and berries will all grow well nearly everywhere, and each has its particular flavor, but grapes have such a delicious nectar-like taste that we never tire of eating them. They are easily digested and extremely healthful.

On this page we offer a number of varieties—hardy, vigorous vines that produce the finest of grapes. Campbell’s Early Black Grapes and Concords are well known, and the Niagara white grapes are early maturing vines with an unusually large yield.

Black Grapes

Campbell’s Early. This superb Grape is fulfilling the promise made for it remarkably well. It forms large, and handsome clusters, thickly set with large round berries, colored a light purple bloom; these are firm fleshed enough to keep and ship admirably, but the tender pulp parts readily from the few small seeds, a quality that is now greatly appreciated; the flavor is rich, sweet and delightful. The clusters ripen very early and hold their berries well, keeping in fine condition for a month or more. The vine is vigorous and bears abundantly. Should be widely planted.

Price, 30c each; $2.50 per 10; $17.00 per 100.

CONCORD. Fine old market leader, with large, handsome clusters of luscious grapes. Entirely hardy, very productive and reliable, succeeds well over a wide extent of country. One of the best known grapes.

Price, 2 yr. 20c each; $1.50 per 10; $10.00 per 100; 1-year extra, $8.00 per 100. See page 16 for special offer on Concords.

Moore’s Early. Clusters of medium size; berries large, round, black, with heavy blue bloom. Desirable for market on account of its earliness, well suited to Canada and northern portions of the United States by its hardiness, but succeeds admirably in the South also.

Price, 25c each; $2.00 per 10; $15.00 per 100.

Worden. This seedling of Concord is larger than the parent in bunch and berry; of better flavor, earlier, as hardy and healthy in every way, producing fine crops that command good prices.

Price, 25c each; $2.00 per 10; $15.00 per 100.

Red Grapes

Agawam. Berries quite large, with thick skin, compactly set upon a large bunch; soft, sweet and sprightly; ripens early. Grows and bears well.

Price, 40c each; $3.50 per 10.

Brighton. Dark red. The most desirable of the early Red Grapes. Very large and handsome. Clusters under favorable conditions are more uniform than those of any other grape. Plant near other varieties, as its blossoms do not always fertilize when alone.

Price, 40c each; $3.50 per 10.

Delaware. A delicious little red grape; juicy sweet, hardy and productive.

Price, 35c each; $3.00 per 10; $17.00 per 100.

Salem. Bunch large, berry large; flesh tender, juicy, with a rich aromatic flavor. A good keeper.

Price, 35c each; $3.50 per 10; $25.00 per 100.

White Grapes

NIAGARA. A great yielder and of fine flavor; ripens early, cluster very solid; large vines. For a long time was the standard commercial sort.

Price, 25c each; $2.00 per 10; $12.00 per 100; $80.00 per 1,000.
An early picking of Cumberlands. A sturdy and wonderfully productive Black Raspberry

Berries are not only one of the finest fruits grown, but one of the fastest money makers as well. The demand for them will never be fully supplied, and the immediate future is going to see them grown to a much greater extend than ever before.

Berries are especially valuable because they bear so soon. In two years they are in full yield. Many farmers find that their berries pay more net cash than their wheat, corn, or stock, and many business and professional men find a great deal of recreation in berry raising, which gives them country life, fresh air, exercise and home fruit.

The efficiency of a raspberry bed depends largely on two things: all old canes, and all but four or five new ones in each bush must be cut out right after the crop is harvested, and the ground should be kept worked.

Raspberries

Black Caps

CUMBERLAND. The business Blackcap. It is of wonderful productiveness, producing regularly and uniformly very large crops. In size the fruit is simply enormous, far surpassing any other variety. The berries run seven-eighths and fifteen-sixteenths of an inch in diameter. In quality it is similar and fully equal to the Gregg. It is unusually firm and is well adapted for long shipments. It is an unusually strong grower, throwing up stout, stocky canes, well adapted for supporting loads of large fruit.

Price, $1.25 per 25; $2.00 per 50; $3.50 per 100; $22.00 per 1,000.

Plum Farmer. The berries are of large size and excellent quality. They are coal black but covered with some bloom which gives them a bluish appearance. The canes are strong growers and very hardy, and produce a very large crop of fruit which is matured quickly.

Price, $1.25 per 25; $2.00 per 50; $3.50 per 100; $22.00 per 1,000.
Latham Raspberries

The big Red Raspberry that out-classes all others. One berry to each square inch in boxes five inches square.

This indicates that as a commercial proposition LATHAM has no rival.

REMEMBER THESE POINTS!!

1—LATHAM is conceded to be the Best Red Raspberry Now Grown.
2—It is vitally important to start a raspberry planting with Mosaic-Free Plants.
3—The supply of mosaic-free plants is short—very inadequate to meet the demand for this money-maker.
4—we have one of the very few supplies of certified plants available.

ORDER NOW—So you can get started in a good paying business—growing fruit for an eager market.

Red and Purple Raspberries

COLUMBIAN. A seedling of the Cuthbert, grown near the Gregg, and believed to be a cross between the two. Of the Schaffer type, but hardly even in Wisconsin. It is a most vigorous grower, canes 1 to 16 feet in length and often an inch in diameter; fruit very large; color dark red bordering on purple; adheres firmly to the stem; seeds small; has a distinct flavor of its own, making it a most delicious table berry.

Price, $1.50 per 25; $2.50 per 50; $4.50 per 100; $35.00 per 1,000.

Cuthbert. Canes tall, vigorous, healthly. Fruit bright crimson, firm.

Price, $1.25 per 25; $2.00 per 50; $3.50 per 100; $23.00 per 1,000.

Golden Queen. Very large; rich yellow; vigorous, hardy, productive, splendid quality.

Price, $2.00 per 25; $3.50 per 50.

King's Early. The King will ripen as early as any variety of Raspberry and owing to its wonderful fruiting quality will continue after other varieties are gone. The berries are very large, firm, beautiful red color and very easily picked. The canes are perfectly hardy and we have never known King to winter kill. Early King is the most profitable variety of Red Raspberry grown and always brings the very top market price. Absolutely free from disease.

Price, $1.15 per 25; $2.00 per 50; $3.25 per 100; $23.00 per 1,000.

St. Regis. This wonderful everbearing Raspberry will give you a big crop of berries from July until frost. St. Regis begins ripening with the earliest red raspberries and continues bearing on the young canes all fall. Berries bright crimson, large size, sugary, rich with full raspberry flavor, very firm and a good shipper. Canes stocky, of good growth, with abundance of dark green, leathery foliage. St. Regis is a very heavy bearer in the regular raspberry season, and in addition continues bearing all summer and fall.

Price, $1.50 per 25; $2.75 per 50; $5.00 per 100; $30.00 per 1,000.

Built on Integrity!

In conducting our business we assume the responsibilities that belong to the business. It's our job to produce and supply to the orchardist and planter, true to name, well matured plants and trees, delivered to him in prime condition.

You can't buy plants and trees from us if we don't think we can satisfy you—and we consider no transaction closed otherwise. Place your order now for early shipment.

Celery City Nurseries
Kalamazoo, Michigan
Varieties marked (Per) are perfect flowering and varieties marked (Imp) are imperfect flowering; and for the best results should have two rows of some perfect flowering variety planted every fourth or fifth row with them.

Postage on Strawberry Plants paid by

**CELERY CITY NURSERIES**

**KALAMAZOO, MICHIGAN.**

**STRAWBERRIES**

Varieties marked (Per) are perfect flowering and varieties marked (Imp) are imperfect flowering; and for the best results should have two rows of some perfect flowering variety planted every fourth or fifth row with them.

Dr. Burrill. (Per). This new variety is a scientific cross of Senator Dunlap and the Crescent, with all the best qualities of both embodied in one. Fruit is large, dark red, of high quality, very firm, and of a beautiful, even shade. Commences to ripen medium early and extends over a long season.

Price, $1.00 per 50; $1.50 per 100; $2.75 per 250; $4.75 per 500; $9.00 per 1,000.

Gibson. (Per). One of the leading market berries grown in Southern Michigan—and has proven satisfactory wherever planted. Fruit is large, even in shape, holding its size remarkably well until the last pickings. Color is glossy, dark red, which extends clear through to the center of the berry. Commences to ripen medium early and last over a long season.

Price, $1.00 per 50; $1.50 per 100; $2.75 per 250; $4.75 per 500; $9.00 per 1,000.

Kellogg's Prize (Imp). This is one of the most productive very late berries we have seen.

Price, $1.00 per 50; $1.50 per 100; $2.75 per 250; $4.75 per 500; $9.00 per 1,000.

Senator Dunlap (Per). A standard old variety and one of the best.

Price, $1.00 per 50; $1.50 per 100; $2.75 per 250; $4.75 per 500; $9.00 per 1,000.

Premier (Per). The grandest and best extra early variety, early-growing, a strong pol-

lenizer, vigorous grower and heavy producer of extra large bright red berries of most delicious flavor. One of the longest season varieties known, beginning to ripen with the earliest and continuing until the late sorts are through. Succeeds in all soils and climates.

Price, $1.00 per 50; $1.50 per 100; $3.00 per 250; $5.50 per 500; $10.00 per 1,000.

Warfield (Imp). A variety of established reputation, but which is being crowded out of first place by Dr. Burrill, which is more productive and averages larger in size. Should always be planted in connection with a perfect flowering variety, of which Dr. Burrill is the best.

Price, $1.00 per 50; $1.50 per 100; $2.75 per 250; $4.75 per 500; $9.00 per 1,000.

**Everbearing**

Everbearing strawberries have been largely planted in the last few years with very good success. They have come to stay. They will bring about as good a crop in June as the common varieties and will bear in favorable weather some berries off and on all summer and another good crop in the fall. Only during the hot weather they rest, while in states with cooler and damper climate, they bear steady all summer. To insure a good crop of berries in the fall, all runners should be cut off and the plants well cultivated or hoed, and in dry weather well watered.

Progressive. Considered by many as the best of the fall bearing varieties. The plants are vigorous and healthy and they multiply all they ought to. The berries are about an inch in diameter, uniform in size, of deep crimson color, very firm and of high quality. It begins to bear with the second early of the June varieties, yields then a heavy crop of berries and is really profitable for its June crop alone. It continues bearing all summer, though not as heavy, of course, and with favorable weather a good crop in the fall when the weather gets cooler again.

Price, $1.65 per 50; $2.75 per 100; $16.00 per 1,000.

Mastodon. The Wonder Berry. The largest, most delicious, heaviest yielding, everbearing strawberry.

Prices of Mastodon Plants—12 for $1.00; 25 for $1.75; 50 for $3.25; 75 for $4.50; 100 for $6.00.
BLACKBERRIES

Blower. New. It has been thoroughly tested for several seasons. Hardy, productive, the finest quality, and brings the highest price of all Blackberries. Has produced 2,694 berries on one bush and 2,720 quarts on one-third acre. Large size; jet-black; good shipper; best quality and unexcelled productivity are the main characteristics of this splendid new sort.

Price, 75c per 10; $1.50 per 25; $3.00 per 50; $5.00 per 100; $35.00 per 1,000.

Eldorado. The vines are very hardy and vigorous, enduring the winters of the far Northwest without injury, and their yield is enormous. The berries are large, jet-black, borne in large clusters and ripen well together; they are very sweet, melting, have no hard core and keep for eight or ten days after picking with quality unimpaired. Perhaps the most valuable sort in cultivation.

Price, 75c per 10; $1.50 per 25; $3.00 per 50; $5.00 per 100; $30.00 per 1,000.

Lucretia Dewberry. A trailing Blackberry, fine flavor; large fruit; very prolific. In size and quality it equals any of the tall-growing varieties.

Price, $1.25 for 25; $4.00 per 100.

CURRANTS

Currants are excluded by Federal quarantine No. 26 from all territory west of Minnesota, Iowa, Missouri, Arkansas and Louisiana.

Prices, except as noted, 2-year old, 25c each; $1.75 per 10; $15.00 per 100.

Cherry. The Standard Red Currant. Fruit very large; a fine upright grower; valuable for market and garden; splendid quality.

Fay's Prolific. One of the best and most popular red Currants. It is productive, hardy and vigorous; it will average larger than Cherry; of the finest quality, and brings best prices on the market; fruit bunches 3 to 5 inches long, easily picked.

PERFECTION. Cross of Fay's Prolific with White Grape and combines the best qualities of both parents. In color it is beautiful bright red and of a size larger than the Fay; the clusters average longer and the size of the berries is maintained to the end of the bunch. It is one of the most productive Currants we have ever known.

Price, 40c each; $3.00 per 10; $25.00 per 100.
Notice the pleasing effect obtained by planting shrubs against the porch and wall

It Is Easy to Beautify Your Home Grounds by Blending Off the Sharp Angles with Shrubs. They Add Charm to Any Home.

Our shrubs are all two and three year old stock. Good shrubs wisely planted will transform an ordinary house into a real home. They give it stability, make it look as though it belonged where it is, and they relieve the sharp angles where the foundation meets the earth. Shrubs planted against the walls will make your home distinctive. We recommend Spirea Van Houttei for the average wall, and for a low wall either Spirea Froebelia, Spirea Anthony Waterer, Spirea Thunbergii, or Barberry. The shrubs should be planted about two feet from the wall and 3½ feet apart.

We offer big, sturdy, highly cultivated shrubs that will grow and blossom the first season after planting.

**Almond**

**Pink Double Flowered.** A vigorous, beautiful tree, covered in May with rose-colored blossoms like small roses; hardy.
Price, $1.25 each.

**Althea—Rose of Sharon**

Fine free-flowing shrubs of compact, upright habit. Very desirable on account of blooming during August and September, when so few other shrubs are in blossom. Make beautiful screens or hedges, or can be planted as specimens.
On following colors: Either bush or tree form: Red, White, Pink, Purple.
Bush Form, price 60c.
Tree Form, price $1.00.

**Barberry**

**JAPANESE BARBERRY** (Berberis Thunbergii). This is a low shrub, with brown, horizontal branches growing so thick and matted that, even though the leaves fall in winter, the hedge still is dense. Add to that the appearance of the bright scarlet berries growing almost as thick as leaves and fresh till spring and you have an idea of its winter garb. In the summer there are hosts of little pale yellow flowers among small, round foliage. It grows 3 feet high only.

Extra strong, bushy plants, 3-year-old, 50c each; for smaller sizes for hedge purposes see page 33.
ORNAMENTALS—Continued

New Red-Leaved Japanese Barberry

It is only once in a lifetime that a really worthwhile, outstanding novelty in hardy shrubs is introduced, and in this new Barberry we have such a plant.

It is similar in all respects to the green-leaved Japanese Barberry which is so popular for mixing in the shrubbery border, as single specimens, or for planting in clumps on the lawn, as well as for foundation plantings and for hedges, but the foliage of this new variety is of a rich, lustrous, bronzy red, similar to the richest red-leaved Japanese Maples. However, unlike these and other colored shrubs in which the coloring fades or disappears entirely as the season advances, this new Barberry becomes more brilliant and gorgeous throughout the summer, and in the fall its foliage changes to vivid orange, scarlet, and red shades, more brilliant and more effective than in the ordinary Japanese Barberry.

Price
1-yr. size, 12 to 15 inch....$ .75 ea.; $7.00 per 10
2-yr. size, 15 to 20 inch...1.00 ea.; 8.00 per 10

Everblooming Butterfly Bush

(Buddleya Variabilis Magnifica.) This shrub from a young plant set out either in the spring or fall, will mature to full size the first summer, producing a handsome bush, which the first year often attains a height of four feet. It produces long, graceful stems, which terminate in tapering panicles of beautiful lilac-colored flowers that are of miniature size and borne by the hundreds on a flower head which is frequently 10 inches long. A single plant the first season will throw out as many as 50 flower spikes, which increase greatly in number during the succeeding years. This shrub is very desirable as an individual specimen in the lawn and garden or placed promiscuously in the shrubbery border.

Price, for very strong plants, 50c each; 10 for $4.50.

Deutzia Pride of Rochester

A choice new sort that excels in vigor, size of flowers, length of panicles and freedom of bloom. The flowers are double, white, tinged outside with pink and open a week earlier than those of other sorts. One of the hardier sorts. Price, 60c each.

Deutzia Gracilis

(Thender Branched). Dwarf growing, dense, bushy, its drooping branches wreathed with pure white flowers in May. Also valuable for winter blooming in pots. Where a low shrub is desired, there is none better, 2 feet high.

Price, 12-18 inches, 75c each.

Deutzia Lemoinei

This variety forms a small dwarf shrub, with spreading branches, usually growing about 3 feet tall. Leaves bright green, 2 to 3 inches long; flowers pure white, in large clusters of panicles. Of vigorous growth, very free flowering and of easy culture. Before the white buds open they look like a bunch of pearls.

Price, 65c each.

Elder, Golden

One of the best yellow foliage plants. Retains its color the entire season and is very conspicuous in every planting. Quick to establish itself, robust grower and attractive.

Price, 65c each.

Forsythia (Golden Bell)

This is the first shrub to blossom in the spring, the golden yellow flowers appearing in great profusion before leaves have formed.

Price, 60c each.

Bush Honeysuckle

A very vigorous-growing shrub, often 8 to 10 feet tall. There are billows and clouds of fragrant white and pink flowers late in the spring. As soon as they fall, just as many red and orange berries come, and these fairly make the landscape glow with life. Come in three colors. Price, 60c each.

Hydrangeas

ARBORESCENS (Hills of Snow). A grand addition to the summer-flowering hardy shrubs, dwarfing the show of other sorts in July and August by the magnitude and profusion of its flower heads. Price, 75c each.

HYDRANGEA PANICULATA GRANDIFLORA. One of the most valuable hardy shrubs. It attains a height of 5 to 6 feet and is perfectly hardy everywhere. The flowers are white, borne in immense pyramidal panicles nearly a foot in length. It commences flowering in August and continues until October. The plant should be cut back every spring at least half a season's growth, as the flowers are borne on new wood and are much finer when the plant is treated in this way.

Price, tree form, $1.50 each; bush form, 75c each.

Anthony Waterer Spirea

(See back cover)
Do not neglect the backyard. It can be made beautiful and attractive with shrubbery and perennial borders

Japanese Quince
(Red). Cydonia. Also called Firebush. Very showy and one of the earliest shrubs to bloom, the flowers appearing before the leaves are fully developed, the brilliant scarlet flowers gleaming like red hot coals. Fruit about 1½ inches in diameter, of yellowish green, and of aromatic fragrance. A few of these cooked with apples gives them a fine quince flavor. Invaluable for border or garden planting and make beautiful informal or clipped hedges. Grows 5 to 6 feet tall. Very hardy and easily transplanted, and will thrive in almost any well drained soil. **Price, 75¢ each.**

Lilacs
Lilacs are such old and intimate friends that it seems they would not need to be described. Yet the intrinsic worth of these flowers with their white, pink, blue, purple and lilac tints in May and a perfume that permeates the very air for quite a distance beyond the tips of the heart-shaped leaves, is something the enjoyment of which will not cloy, even while other flowers come and go on waves of popular favor. It is a very upright shrub, easily grown and at home in any soil.

Lilac (Persian). Small foliage and bright purple flowers. **Price, 85¢ each.**
Lilac (Purple). The well-known old-fashioned variety with purple fragrant flowers in May. **Price, 2 to 3 feet, 60¢; 3 to 4 feet, 75¢.**

Mock Orange
This is the well known, sweet scented Mock Orange or Syringa. For a tall screen, plant Mock Orange. It grows 10 feet high, thick and dense and does not shoot up into the air. The flowers come in May and June and are rich, a creamy white, and deliciously perfumed. There are plenty of them, too. Mock Orange adds beauty and grace to its surroundings. **Price, 60¢ each.**
Golden Syringa (Mock Orange). A very useful dwarf shrub with golden leaves. **Price, 85¢ each.**

Snowball
Common Snowball. The old-fashioned snowball and always popular. Its large, globular clusters of pure white flowers in May and June have made it a conspicuous shrub in the garden for many generations. **Price, 75¢ each.**
ORNAMENTALS—Continued

Spireas

(See Back Cover for Sizes and Prices on all Spireas.)

Spirea, Anthony Waterer. This beautiful variety produces flowers of a bright crimson and blooms so freely that it may be kept flowering during the summer till late fall by trimming away dead blooms. Foliage is very handsome, being variegated with creamy white or yellow. Grows 15 to 20 inches high, is very useful for massing or border in front of taller shrubs.

Spirea, Frobelia. A strong growing shrub, somewhat similar to Anthony Waterer, but grows a trifle taller, with broader leaves. The flowers are more rose pink. Blooms from June till fall. The tips of the leaves are reddish-purple, making the bush much more attractive than Anthony Waterer. Perfectly hardy here.

Spirea Opulifolia Aurea (Golden-leaved). Yellow tinted foliage and white flowers.

Spirea Thunbergii. (Snow Garland). A Japanese variety of medium size, with narrow, delicate leaves and a profusion of small, white flowers in early summer. One of the best. Leaves narrow, bright green, turning in autumn to brilliant shades of orange and scarlet. Grows 3 to 4 feet high. Very few shrubs are better for a low hedge.

Spirea Van Houttei. A variety of Bridal Wreath. Probably the most beautiful of Spireas. In May and June the arching branches are actually covered with little white flowers. The foliage is beautiful. Spirea has been much used for making wreaths and garlands. The shrub grows to 6 feet, is hardy and is much planted for borders and single specimens. Perfectly hardy, vigorous grower and fine for fancy hedge and as a screen.

Snowberries

Native shrubs of low, upright habit, good for planting in shady nooks or massing underneath some taller growing sorts. They are particularly ornamental in late summer, when their crowded clusters of handsome berries are at their best.

White. Highly valued for use in densely shaded locations inconspicuous rose-colored flowers in June and July, followed by large clusters of milk-white fruits that remain far into autumn. Price, 50c each.

Red. The flowers are borne in dense terminal spikes. They are followed in late summer by dark purplish red berries, smaller than the fruit of White Snowberry and hanging in close clusters. Well adapted for shady places. Price, 50c each.

Tamarix

Shrubs of strong but slender, delicate growth similar to the asparagus. The pink flowers, flouncy foliage and graceful little make them one of the most desirable shrubs for background or inter-planting.

Price, 60c each.

Viburnum

Lantana. White flowers; clusters of bright red fruit, changing to black.

Price, 75c each.

Opulus (High Bush Cranberry). This handsome shrub has bright red fruits; are in some sections used as substitute for the cranberry. Large, healthy leaves; free from insect attacks.

Price, $1.00 each.

Weigela

The white, pink, and rose-colored even crimson sometimes—flowers, and variegated foliage lend in lively and effective tone to solid greenery. The blossoms come in June and July, after lilacs and others have gone. The shrub has spreading, arching branches and prefers partly shaded places. Fine among spruces, pines, and rhododendron. Height, 5 feet. Very hardy. Three colors.

Prices—Pink, 60c; White, 75c; Red, 85c; Variegated leaf, 75c.

Shrubs for Special Purposes

Tall Growing for Heavy Plantings or Corners. Tamarix, Amour River Privet, Altheas, Mock Orange, Bush Honeysuckle and Lilacs.

Shrubs Whose Flowers are Succeeded by Ornamental Fruit. Barberry, Elder, High Bush Cranberry, Rosa Rugosa and Snowberries.

Shrubs with Variegated or Colored Foliage. Elder Golden, Syringa Golden, Weigela Variegated and Spirea Frobelia.
Hardy Perennials

Hardy perennials are ideal flowers for the home garden. They are very satisfactory for borders, and very effective when planted along the front of shrubberies and along driveways and walks. They do not need to be taken up for the winter.

Prices of all varieties, 30c each; $2.50 per 10, except as noted.

Aquilegia (Columbine). Plants of elegant habit, free flowering, both single and double varieties in many colors, blooming in spring and early summer.

Campanula (Bluebells). The beauty of the Bluebell is well known and the plants are most hardy, very easily grown.

COREOPSIS GRANDIFLORA. Splendid, hardy plant, rich golden-yellow flowers from early summer until fall.

Chrysanthemum. Beautiful plants that produce a profusion of bloom in a wide range of form and color at a time when other plants have been nipped by frost.

DAISY (Shasta). Large, snowy-white flowers in bloom all summer.

DELPHINIUM (Larkspur). Beautiful hardy plants grown in borders for their stately habit and handsome spikes of light and dark blue flowers. June till early fall.

Dianthus (Sweet William). Old time favorites, bearing during May and June a profusion of round-topped clusters of flowers of all shades of red and pink to white.

Digitalis, Foxglove. This variety is not grown in separate colors, but generally produces flowers which range in color from white, creamy white, rose, and pink to purplish-red.

Dicentra (Bleeding-Heart). Heart-shaped, rose-colored flowers in drooping spikes, in early summer. Price, 75c each.

Gaillardia (Blanket Flower). Large showy flowers, yellow and orange-red, from early summer to November.

Hibiscus (Mallow). A very showy plant in any position but succeeds especially well in damp places. Very large, single hollyhock-like flowers produced during the entire summer. About 5 feet. Red, white, and pink.

Price, 35c each.

Lobelia (Cardinal Flowers). Intense scarlet blooms opening along tall spikes in July and August.

Lychnis (Maltese Cross). Old-fashioned flowers of easy culture.

Papaver (Oriental Poppy). Showiest of all poppies, large, scarlet and red flowers on long stems.

Platycodon (Balloon Flower). Star-shaped, bluish flowers, very large, June-July.

Stokesia (Cornflower Aster). Handsome plant with large flowers of fine sky-blue color. July to early fall.

Gladiolus Bulbs

This is a class of summer-flowering bulbs which is valuable for its magnificent show of bloom in the gardens, and for its generous supply of cut flowers. They will thrive in any good garden soil.

SPECIAL MIXTURE OF
LARGE-FLOWEDED GLADIOLA

It is not necessary to pay fancy prices for special varieties which because of being highly rated, demand extravagant prices. We offer this season, this fine mixture, made up of many of the best varieties of gladioli and sold at a price which is within the reach of all lovers of flowers.

Price by mail, 25 for $1.00; 50 for $1.85; 100 for $3.50. Postage paid by Celery City Nurseries.

Phlox

Can be supplied in five colors—Red, pink, white, purple and salmon.

Prices of all colors, 35c each; $3.00 per 10.
PEONIES

MAKE BEAUTIFUL BORDER PLANTING

Note the Special Price We Have on Peonies This Year

Peonies succeed admirably in any loamy soil and may be made to thrive in the shady parts of the lawn where other flowering plants refuse to bloom. For bordering walks and driveways and for the flower garden, an assortment of Peonies is quite indispensable. Our list includes some of the choicest varieties that have been tested on our grounds. By making proper selection, the blooming period may be extended in many locations from the middle of May to the end of June. They offer a range of color from pure white to deep purple, and many of them are fragrant. All sturdy plants with three or four eyes.

Prices of Peonies ordered by colors—Red. Pink, White, 45c each; $4.00 per 10.
Prices ordered by named varieties, $1.00 each.

Dahlias

The Dahlia is now taking its place in the front ranks of summer-flowering plants. This is largely due to the splendid new sorts that are being brought out in the Cactus and Decorative class, and we might also say the Single and Collarette. There is nothing else that can equal them in range of color and abundance of bloom. The Decorative and Single varieties are especially fine for cut-flowers. Our roots are all field-grown and produce strong, flowering plants the first season.

Price, 25c each; $2.00 per 10.

Cannas

Give us the colors you want and whether tall or dwarf variety, and we will make good selections. Round beds are the most effective. A bed 7 feet in diameter requires 19 plants; and a bed 10 feet in diameter requires 37 plants as follows:

Place 1 plant in center of bed, with the front row of 6 plants 18 inches from center plant, and the second row of 12 plants 18 inches farther out, making the 7-foot bed. A 10-foot bed would require a third row of 18 plants, or 37 in all.

Price, 25c each; $2.00 per 10.

Liberty Iris

This is one of our finest hardy perennial plants, known before the war as German Iris or Fleur-de-Lis. From a large collection we selected the following varieties covering a beautiful and wide range of colors:

Prices of all kinds of Liberty Iris, 20c each; $1.50 per 10.

Celeste. Pale blue.

Purple Prince. Purple.

Azure. Sky blue.

Maroon. Red and gold.

Bird of Paradise. Creamy white, yellow center.

Honorabilis. Brown and yellow.

Brown and Old Gold.

28
Ornamental Vines

On Brick or Stucco, plant Boston Ivy.
For Porches, plant Clematis, Japanese Honeysuckle or Climbing Roses. They are fragrant, refreshing, and beautify your home.

Boston Ivy (Ampelopsis Veitchii or Japan Ivy). It is a rapid grower and clings to brick or stone walls without artificial fastening. The foliage is handsome dark green in summer, changing to crimson and yellow in autumn. It is a little tender while young and requires protection the first winter, but once established there is no further risk. Price, strong vines, 85c each.

Clematis Jackmanni. A large-flowering variety. The flowers often 4 to 6 inches in diameter, intense violet-purple with a rich, velvety appearance. It blooms continually from July until frost. Price, $1.00 each.

Clematis Paniculata. A rapid-growing vine, with handsome, clean, glossy foliage and medium sized, star-shaped, fragrant, white flowers in September when few other vines are in blossom. Very attractive and probably the most largely planted of all the vines. Price, 60c each.

Dutchman’s Pipe. A very rapid-growing vine, which on account of its very large heart-shaped leaves is desirable when dense shade is required. Obtains its name from its peculiar brownish flowers, resembling in shape a miniature pipe. Price, $1.25 each.

Hall’s Japan Honeysuckle. One of the most popular of all the climbing vines, which in addition to its ordinary uses as a climber is valuable for covering banks, bare spaces, etc., where grass will not grow. Flowers white, changing to yellow, very fragrant and in bloom the whole season. Price, 60c each.

Virginia Creeper (American Ivy or Woodbine) The well-known native ivy with five-parted leaves that change to scarlet in fall. Blue-black berries. Hardy and quick-growing. Requires artificial support on walls. Price, 60c each.

Purple Wisteria. Very desirable for heavy trellises and pergolas, also attractive if trained to old trees. Pea-shaped, purple flowers in dense, pendant clusters sometimes a foot long. Blooms in May. Price, 75c each.
ROSES

THE BEAUTY OF ROSES ADDS A TOUCH OF LOVELINESS AND COLOR TO YOUR GARDEN

Everblooming Roses

Everblooming Roses are the most satisfactory roses. They may be cut freely from June to November.

HYBRID TEAS

Prices of all varieties on this page, strong 2 year old bushes, 90c each; any 10 for $8.00.
By Parcel Post, postpaid, for 5c per bush extra.

Captain Christy. Delicate flesh-pink.

COLUMBIA. New. Glowing pink.

Dudley Cross. Salmon flesh, shaded rose.

ETOILE de FRANCE. Vivid crimson, with darker shadings.

Francis Scott Key. Deep, even red; large; very double.

Frank W. Dunlop. Won silver medal for the best new pink rose at the International Flower Show at New York last spring.

GRUSS AN TEPLITZ. Scarlet; constantly in bloom.

HADLEY. Velvety crimson.

Hoosier Beauty. Glowing scarlet.

J. B. Clark. Intense scarlet, very fragrant, growth strong and upright.

J. J. L. Mock. Outside of petals deep pink, inside silvery rose.

KAISERIN AUGUSTA VICTORIA. White; fine form.

Killarney Brilliant. Deep rosy carmine.

Killarney. Pink, favorite bedding rose.

La France. Rose-pink. One of the best bedding roses.

Lady Hillingdon. Deep apricot-yellow.

Los Angeles. Luminous flame-pink, toned coral, shaded translucent gold at base of petals.

LUXEMBOURG. One of the best yellow roses, quite similar to Sunburst but thrives very much better here than Sunburst. Luxembourg will prove to be one of the most satisfactory yellows.

MADAM CAROLINE TESTOUT. Rich pink.

Madam Edward Herriot. Coral-red, shaded yellow and scarlet.

Madam Butterfly. Bright pink, apricot and gold.

Meteor. Dark velvety crimson, shaded maroon.

Mrs. A. Ward. Yellow, sometimes shaded salmon and rose.

Mrs. Charles Russel. Rosy-pink; large blooms, long stemmed.

National Emblem. Dark crimson. Flowers full and perfect.

Ophelia. Salmon-flesh, shaded rose.

RADIANCE PINK. A brilliant rosy-carmine, displaying beautiful rich and opaline-pink rings in the open flower.

RADIANCE RED. Dazzling crimson-scarlet.

Sunburst. Rich yellow, shaded coppery orange.
Hybrid Perpetual Roses

These roses combine hardiness, vigor of growth and size of flower, with the greatest variety in colors and form. They are very popular and the most useful of all roses and particularly valuable for beds or borders in the northern and middle states. If you like roses, set out a row or two of these and you will be well repaid. Plants should be set 15 to 20 inches apart. We furnish only field grown, 2 and 3 year old, well-rooted plants, which are the best for all purposes. We name below the hardiest and best varieties.

Price, 75c each, except as noted. By Parcel Post, postpaid, 5c extra per bush.

American Beauty. An old favorite Crimson Rose.

Frau Karl Druschki (Snow Queen). White American Beauty. The finest snow white hybrid perpetual rose. Very fine, double, and durable flowers, and large, long-pointed buds of first class form. The open flowers are very large, perfectly double and delightfully fragrant petals are shell-shaped. These qualities in the flower, and a big, vigorous compact, leathery foliage bush, blooming continuously and abundantly, at last give us a rose whose desirability and value we could not possibly over-state. In our opinion it is the grandest new rose that has been introduced in many a year. Certainly no other white rose can begin to compare with it.

General Jacqueminot. Bright crimson; perfect; medium size flowers, very much perfumed and very handsome and brilliant in the bud. General Jack blooms early and profusely; grows vigorously, with a compact habit and has handsome pointed leaves. An old favorite.

Harrison’s Yellow. A rather rare rose; one of the finest. It is pure, deep yellow and has very rich coloring, found in few flowers. The bush is hardy and easily taken care of. Price, 90c each.

Mrs. John Laing. This rose is a silky pink, which shows different in varying lights. Finely formed, large, double, very sweet flowers, on long stems. The quick growing bush blooms nearly equal to the monthly roses. One of the best Hybrid Perpetuals for all outside purposes, also desirable for forcing.

Paul Neyron. The largest rose in cultivation Sometimes called the Paeony Rose. Color light, smoky rose; flowers are very double and full, delightfully fragrant. The plant makes a strong, healthy growth, and has clean, glossy foliage. Blooms very good from June until late October.

Soleil d’Or. (Sun of Gold). A strong, hardy rose; large, full and double; golden orange yellow tinged with red and rosy pink; a magnificent rose. Price, 90c each.

Ulrich Brunner. Seedling from Paul Neyron, extra large, bold flowers; full and globular, profuse bloomer, very hardy and ornamental in every way.

Cultural Directions for Roses

Soil and Location. Roses require sunshine. They do well in any good garden soil. Avoid sand, too much clay, or ground which is stagnant. Be sure the bed is well drained. Enrich with decomposed stable manure; cow manure is preferable. Work this well into the soil. Do not put any clear manure in the holes with the plants.

Planting. Dig a good, large, deep hole. Spread the roots out as much as possible, and when the hole is nearly filled tread the soil firmly with the foot. When planting is finished a good soaking with water will prove beneficial, should the ground be dry. Then mulch well with coarse manure and Nature will do the rest. Water freely only in dry weather and then in early morning or late afternoon.

All Roses should be set very deep and cut back from one-third to one-half when planted, and the ground should be stirred frequently. Roses need good cultivation.

Winter Protection. All Roses give better results if protected in winter. The best method is to bank the plants with earth as high as possible and cover with stable manure. Remove coarse litter in the early spring and pull earth away from plants before pruning, cutting out old wood and leaving 3 to 6 of the strongest shoots of last year’s growth, cutting these back to within 8 to 12 inches of the ground.
Climbing Roses

Crimson Rambler. The most popular climbing rose ever introduced. It is so generally seen everywhere that the rich profusion of vivid crimson clusters of flowers are familiar to everyone. The heavy canes will climb 15 to 25 feet in a season, and the glowing panicles of bloom remain on a long time without losing their brightness. Price, 65c each.

Dorothy Perkins. Clear, transparent flowers growing in large clusters, of 30 to 40 each. They have daintily crinkled petals and the bush is one of the best climbers grown. Customers’ choice of three colors: Pink, red and white. Price, 65c each.

Flower of Fairfield. Of the numerous varieties raised in the last few years, it is doubtless one of the best. Its flowers, which are produced in marvelous profusion, are of a fine crimson color and more brilliant than the common Crimson Rambler. The growth is vigorous, flowering freely and continuously throughout the season. Price, 85c each.

Tausendschoen (Thousand Beauties). Covered with bright blossoms of every imaginable shade from white to deep pink, borne in clusters; quite double. Price, 75c each.

Climbing American Beauty. Rosy crimson, same exquisite fragrance as old American beauty. Flowers large, very free bloomer. Price, 75c each.

Dr. W. Van Fleet. A superb variety. Flowers full and double, of delicate perfume, will run 4 inches and over in diameter when open; buds pointed; color a remarkable shade of flesh pink and outer surface, deepening to rosy flesh in center. Price, 75c each.

Dwarf Baby Rambler Roses

Always in bloom, from early spring until frost comes. Baby Ramblers greet you cheerfully at your home every day. They grow 15 inches high and are fine indeed for dwarf hedges, for massing in beds or for single specimens in the open or in pots. They bear flowers abundantly, which always come in clusters of shining color.

Baby Rambler. Customer’s choice of three colors—red, pink and white. Price, 75c each; $6.50 per 10.

Rosa Rugosa—Japan Roses

While these roses will adorn any location we especially recommend them for shrubbery borders. They are of very vigorous, robust habit, being impervious to attacks of insects of all kinds. Their handsome foliage and flowers especially recommend them. The blossoms possess a delightful fragrance and are followed by large bright scarlet hips or berries, which prolong the attractiveness of the plant well into winter. Hardy everywhere. Should be universally planted. Colors—Red, pink and white. Price, 75c each; $6.50 per 10.

Rose-Hugonis

Hugonis is a new Yellow Rose, and Yellow you know are always good sellers. But more than that Hugonis is the first yellow to bloom in the spring, three weeks before most other roses—and what a bloom! Did you ever see it? Every branch of last year’s growth is lined to the tip with flowers like dainty yellow hollyhocks. The branches bend over with the weight of the bloom.

Hugonis is completely hardy as far north as Winnipeg. Price, $1.00 each; $8.50 per 10.
Hedge Plants

Privet Makes an Ideal Hedge

A small amount of money invested in beautiful hedges will add more value to a country or town home property, dollar for dollar, than any other similar investment without exception. A hedge planted about the borders of a lawn will transform a heretofore bare looking spot into a place of beauty; and you can keep it low or let it go high, as a screen. City lots may be divided by hedging with fine effect. In dozens of different ways, which suggest themselves to the property owner, hedging may be used with great profit. A hedge is easily set, a little care will keep it in perfect condition, and it is a wonder that more are not planted.

We offer herewith the plants best suited for the purpose, each having special merits of its own. Privet and Barberry are probably the best for most situations.

Barberry

Set plants 15 to 18 in. apart in single rows.

Privet

Amoor River North Privet. One of the best hedge plants because of its extreme hardiness. Similar to the well-known California Privet, but much harder. A valuable shrub for hedges and borders in cold and exposed places. Of fine, upright growth with lustrous dark green foliage, nearly evergreen. Transplants easily, grows quickly, making a hedge the first year, and succeeds in nearly any soil. Set plants 8 inches apart in single rows and cut back to 4 inches above the ground to make hedge bushy at bottom. 12 to 18 inches, $9.00 per 100; 18 to 24 inches, $12.00 per 100; 2 to 3 feet $15.00 per 100.

California Privet. Most popular half-evergreen hedge. Remarkably beautiful, glossy, dark green foliage; strong, rapid grower. It transplants easily, grows quickly, making a hedge the first year, and succeeds in almost any soil. The plants should be set about 8 inches apart and cut to 3 or 4 inches above the ground after planting to make the hedge bushy at the bottom. 12 to 18 inches, $5.00 per 100; 18 to 24 inches, $8.00 per 100; 24 to 30 inches, $10.00 per 100.

Evergreens

Evergreens are beautiful all the year and form grand specimens in time. We strongly recommend our customers to plant more largely of the hardy sorts. Our stock is all carefully selected. All specimen Evergreens balled and burlapped.

Arbor-Vitae

American Arbor-vitae. A splendid native that grows well anywhere and thrives over a wide range of climate. The habit is erect and pyramidal. The foliage soft and light green in color.

Price, 1½ to 2 feet, $1.75 each; 2 to 3 feet, $2.75 each; 3 to 4 feet, $3.75 each; 4 to 5 feet $5.50 each.

Globe Arbor-vitae. Of dense, dwarf habit, globular in outline; color a pretty light green.

Price, 15 to 18 inches, $3.00 each; 18 to 24 inches, $4.50 each; 21 to 30 inches, $5.00 ea.

Pyramidalis Arbor-vitae. A densely branched Arbor-vitae, of perfectly columnar form. One of the most remarkable Evergreens in respect to its symmetry. Like the Irish Juniper it holds its perfect fastigiate shape throughout life without trimming or pruning. It is perfectly hardy and will succeed anywhere that the American Arbor-vitae grows.

Price, 2 to 3 feet, $3.25 each; 3 to 4 feet, $5.00 each; 4 to 5 feet, $6.00 each.
Spruce

Koster’s Blue Spruce. A type of the Colorado Blue Spruce; it is the highest colored and most striking of all the Evergreens for lawn planting; the foliage is a rich and healthful silvery blue; very hardy.
Price, 4 to 5 feet, $35.00 each.

Norway Spruce. The most generally used of the evergreen trees. Useful for screens and wind-breaks on account of its rapid growth. It makes a tall tree, and as an individual tree, with room to develop, is of pyramidal, symmetrical growth, its lower branches sweeping the ground.
Price, 3 to 4 feet, $3.00 each; 2 to 3 feet, $2.50 each.

White Spruce. A native tree of medium size and pyramidal form; bark light colored and foliage silvery gray; very hardy variety.
Price, 2 to 3 feet, $4.00 each.

Juniper

Irish Juniper. A distinct and beautiful variety of erect, dense conical outline.
Price, 1½ to 2 feet, $1.75 each.

Pfitzeriana Juniper.
Price, 1½ to 2 feet, $3.00 each; 2 to 3 feet, $5.00 each.

Sabina Juniper. A beautiful low spreading tree.
Price, 1½ to 2 feet spread, $3.50 each.

Pine

Mugho Pine. Very distinct, leaves short, stiff, a little twisted and thickly distributed over the branches; does not grow tall, but spreads over the ground, generally assuming a globular form; very dense.
Price, 12 inch spread, $3.00; 24 inch spread, $5.00 each.

White Pine. (Subject to quarantine No. 26).
Price, 3 to 4 feet, $8.00 each.

---

Plant Well

Care of Young Trees. Unpack the young trees as soon as received, and either plant them or heel them in at once. It is a good plan to soak them thoroughly and cover them up to prevent drying out.

Planting. When ready to plant, dig your holes large—so big that you can spread out all the roots as far as they will go. Dig the holes 6 inches deeper than you are going to put the trees, and fill in 6 inches of top soil. Set the tree perhaps 1 inch or 2 inches deeper than it stood in the Nursery. Place the tree in position, fill in fine mellow soil around the root with the hand, arrange all roots in their natural position, then pack the soil firmly around them and around the crown. Now fill the hole within 2 inches of the top and press down the earth with foot, then pour in a gallon of water and fill up level with loose soil.

Pruning When Planting. You will need to prune back your young trees severely when setting them, and this is your chance to shape up your future orchard tree. Do not be afraid of cutting away too much of the top. The important thing is to allow it more roots than top. The nearer it is to a straight whip, with buds leaving the trunk in a spiral from bottom to top, the better shaped the tree will be. Avoid forks. The main branches should be headed back each year to force them to become stocky and bear large crops without breaking down. In a general way, cutting ends of roots of fruiting trees and plants invigorates new growth.

Planting Distances. The following distances are approximately correct:

- **Apples** ........ 25 to 40 ft.
- **Pears, Standard** 18 to 20 ft.
- **Pears, Dwarf** .... 10 to 15 ft.
- **Cherries, Sweet** 20 to 25 ft.
- **Cherries, Sour** ... 18 to 20 ft.
- **Plums** ........... 18 to 20 ft.
- **Peaches** ......... 18 to 20 ft.
- **Apricots** ........ 18 to 20 ft.
- **Quinces** .......... 10 to 16 ft.
- **Grapes** .......... 6 to 8 ft.
- **Gooseberries and Currants** .... 4 to 6 ft.
- **Raspberries, Red** 2 to 7 ft.
- **Blackberries, Raspberry** .... 7 to 8 ft.
- **Blackberries** .... 2 to 7 ft.
- **Dewberries** ...... 3 to 7 ft.
- **Strawberries** .... 1 to 4 ft.

Number of Trees and Plants to an Acre.
The distances given are figured each way.

- 4 feet .................. 2723 ft. 18 ft. .................. 134
- 5 feet .................. 1742 ft. 20 ft. .................. 105
- 6 feet .................. 1210 ft. 25 ft. .................. 70
- 8 feet .................. 681 ft. 30 ft. .................. 50
- 10 feet ................ 435 ft. 32 ft. .................. 49
- 12 feet ................ 365 ft. 40 ft. .................. 40
- 16 feet ................ 170 ft. 45 ft. .................. 22

Cultivate your orchard or grounds (if ornamentals, at least near the trees) as you would a garden, and keep a well-worked surface all summer and until time for trees to stop growing for the year. Give them plenty of humus in any form, and plenty of plant food in the way you can get it best.

Ornamental Trees

Mountain Ash
Rapid-growing tree, of fine, symmetrical outline. Upright or spreading branches, forming a pyramidal or round-topped crown. Leaves compound, with five ovate leaflets, dark green and lustrous above, whitened beneath, fading in autumn with tones of purple and yellow. A beautiful and desirable tree for street or park, and should be extensively planted. They thrive in almost any moist, fertile soil.
Price, 6 feet, $1.50 each.

Catalpa

Hardy or Western Catalpa (C. speciosa). A valuable, upright, rapid-growing tree, that is being extensively planted in the West for railroad ties, telegraph poles, etc. The flowers (which appear in June) are borne in large clusters, are creamy white, slightly mottled inside, and are followed by long, bean-like pods that remain on the tree during the winter. Leaves are very yellowish green.
Price, 8 ft., $1.00 each; 10 ft. $1.50 each.

Bungei Catalpa (C. Bungei). A species from China; of dwarf habit, growing only 3 to 4 feet high; when grafted on stems 7 to 8 ft. high, it forms a very effective umbrella-shaped tree.
Price, 5 to 6 ft., $2.50 each; $4.50 pair.

Crab

Bechtel's Double-flowering Crab. About the middle of May the trees are covered with beautiful, double, pink, sweet-scented flowers, that at a distance look like small roses. Tree is a moderate grower, hardy and of upright habit. One of the very best.
Price, 3 to 4 ft., $1.50 each.

Elm

American Elm. Large, lofty, limbs growing in wide, sweeping arches. Fine for long drives or lanes.
Price, 6 ft., $1.00 each; $9.00 per 10; $70.00 per 100; 8 ft., $1.25 each; $10.00 per 10.

Horse Chestnut

Horse Chestnut. A fine tree, which grows slowly, but finally reaches 60 feet, and is handsome and desirable all the time. The glorious white flowers come in May.
Price, 5 to 6 ft., $1.50 each.

Poplar

Carolina Poplar. Grows 50 feet high, very quickly. The tree is very sturdy, and especially while young is handsome and useful. It is planted where quick effects are wanted.
Price, 5 to 6 ft., 40c each; $3.50 per 10; 6 to 8 ft., 50c each; $4.50 per 10; 8 to 10 ft., 60c each; $5.00 per 10.

Lombardy Poplar. Well known for its erect, rapid growth and commanding form. Leaves glossy green above, silvery beneath. Always makes a striking feature in any landscape.
Price, 6 to 8 ft., $1.00 each.
ORNAMENTAL TREES—Continued

Weeping Trees

Weeping Maple. Has all the characteristics of other Maples and in addition droops somewhat like the better known weeping willow. Price, 6 to 8 ft., $2.00 each.

Weeping Mulberry. This is the best dwarf weeping tree. The branches droop gracefully, clear to the ground. Handsome and odd. Price, $5.00 each.

Weeping Elm. Price, $5.00 each.

Weeping Willow. Well known and graceful. Grows to 40 feet. Price, $1.50 each.

Price, 12 to 18 inches, $2.50 per 100; $15.00 per 1,000; 18 to 24 inches, $3.50 per 100; $20.00 per 1,000.

Black Locust. A rapid grower and very lasting for posts. The tree is handsome and especially attractive in June when in bloom.

Price, 12 to 18 inches, $3.00 per 100; $16.00 per 1,000; 18 to 24 inches, $4.00 per 100; $22.00 per 1,000.

Nut Trees

These trees are not only useful for shade and ornamental purposes, but bear an abundance of nuts which are very profitable. The growing demand for nuts is giving quite an impetus to the planting of nut trees. Many farms contain land that would be far better planted to nuts than anything else, and would pay better than farm crops, besides annually growing more valuable as timber.

Butternut. Sometimes called White Walnut. The tree greatly resembles the American Black Walnut, to which it is closely allied. The nuts are elongated, more oily than the walnut and less pronounced in flavor; some consider the quality superior. Yields well and is perfectly hardy. Grows 20 to 40 feet.

Price, 4 to 5 feet trees, $1.25 each; 5 to 6 feet, $1.50 each.

Walnut Black. A native tree of large size and majestic form, beautiful foliage. The most valuable of all trees for its timber, which enters largely into the manufacture of fine furniture and cabinet ware, and brings the highest price in the market. Tree a rapid grower, producing a large, round nut of excellent quality. Grows 30 to 40 feet.

Price, 4 to 5 feet high, 75c each; $1.00 per 10; 5 to 7 feet high, $1.00 each; $3.00 per 10.

Mulberries

In the South it is often claimed that each Mulberry bush is worth as much as ten bushels of corn every year. Hogs and poultry eat the berries.

Downing's Everbearing. The beauty of this as a lawn or street tree is quite enough to commend it, but in addition it yields an abundant supply of its large, valuable berries for about three months.

Price, 4 to 5 foot trees, $1.00 each.

Russian. A hardy, rapid-growing tree, introduced from Russia by the Mennonites; foliage abundant; valuable for windbreak. Fruit of little value.

Price, 4 to 6 foot trees, 75c each; $6.00 per 10.

Please write below the names and addresses of a few of your friends who are interested in Fruit Growing and home beautifying. We will send them our Catalog.
When and How to Spray—

As soon as planting is over, commence to protect your future beauty and money-makers against fungus, insects and animals. Here are a few general hints:

SPRAYING FORMULAS

BORDEAUX MIXTURE

Copper Sulphate .......................... 6 pounds
Quicklime .................................. 4 pounds
Water ...................................... 40 gallons

Dissolve the copper sulphate by putting it in a bag of coarse cloth and hanging this in a vessel holding at least 4 gallons, so that it is just covered by the water. Use an earthen or wooden vessel. Shake the lime in an equal amount of water. Then mix the two and add enough water to make 40 gallons. It is then ready for immediate use. For rots, moulds, mildews and all fungous diseases.

COPPER SULPHATE SOLUTION

Copper Sulphate .......................... 1 pound
Water ...................................... 15 gallons

Dissolve the copper sulphate in the water, when it is ready for use. This should never be applied to foliage, but must be used before the buds break. For peaches and nectarines use 25 gallons of water. For fungous diseases.

PARIS GREEN

If this mixture is to be used on peach trees, 1 pound quicklime should be added. Repeated applications will injure most foliage unless lime is added. Paris Green and Bordeaux can be applied with perfect safety. The action of neither is weakened, and the Paris Green loses all caustic properties. For insects which chew.

LONDON PURPLE

This is used in the same proportion as Paris Green, but as it is more caustic it should be applied with the lime, or with the Bordeaux Mixture. Do not use it on peach or plum trees. For insects which chew.

HELLEBORE

Fresh White Hellebore ............. 1 ounce
Water ................................. 1 gallon
Apply when thoroughly mixed. For insects which chew.

KEROSENE EMULSION

Hard Soap ............................. ½ pound
Boiling Water .................... 1 gallon
Kerosene ............................. 2 gallons

Dissolve the soap in the water, add the kerosene, and churn with a pump for 5 to 10 minutes. Dilute 10 to 15 times before applying. For insects which suck, cabbage worms, and all insects which have soft bodies.

ARSENITE OF LEAD

Arsenate of Lead, 4 to 6 pounds. Water, 100 gallons.

BLACK LEAF 40

(May be obtained at Drug stores.)—Very inexpensive.

SPRAYING CALENDAR
